TELEGRAPH WITHOUT WIRE Chief Devery, which he had made

Marconi System.

Messenges Sent from a Balloon - Firing Magazines by an Electric Spark - No Wires to Cut.

London, August 6 -There has been general and widespread interest in usval circles on account of the free use of Marconi's sysof the free use of Marconi's system of wireless telegraphy. Naval 837. Mr. Moss explained that he manceuvres have shown the value gave the figures to show the in-of wireless telegraphy in war, crease of crime in the district The Rev. J. M. Tacon and Messrs. during the year. In the first six months of 1899 the number was J. N. and N. Maskelyne recently 196. carried out a series of interesting Mr. Moss said that many robexperiments in wireless telegraphy beries that occurred in the prewith a balloon, which is likely to cinct were not recorded on the prove even more valuable to peace 31 ful mariners.

As is well known, the safety of 35 the navigator and his vessel fre-55 quently depends upon warnings conveyed from time to time by sound. All kinds of abnormal deviations in the apparent direction from which the sound eman-ates are noticed. In short, the mariner is brought face to face with all the peculiarities of atmos-pheric acoustics. The Tacon and Maskelyne experiments were devised with the object of ascertaining precisely what is the nature of these peculiarities, and what are the conditions under which they are observed. When these results have been secured scien ... tists will be in a position to pro-68 vide a remedy for the errors men-87 tioned. The balloon ascent was made

from Newbury at 8 o'clock in the from which it did not emerge for some minutes, when it finally appeared as a speck in the distance.

In the meantime Mr. N. Mask elyne transmitted several messages to the occupants of the balwere being received.

Heavy gun cotton catridges, sus-pended below the car of the balloont were fired from the electric station on the ground when the balloon was some miles distant, and there were similar discharges shook the ground.

Another experiment was the firing of a powder magazine electric ally from a distant point, without visited by thousands.

Contact, the firing point being the About a year ago contact, the firing point being the transmitting station between which disappeared from this locality, balloon communication was main-

tion of the possibility of utilizing safe from molestation by the Mex the principle of aetheric commutation Government. mines and similar destructive contrivances, the only connection necessary being through the medium

of the all pervading ether.

The advantages of this system The advantages of this system old and others are confident that are that there will be no connect- her presence in the Yaqui country 0 51 ing wires to be cut by the enemy, 0 16 nothing which could fall into their 0 31 hands, while nothing could prevent communication fron being established at the right moment. The initial experiment proved a

perfect success.

### NEW YORK CRIME INCREASING.

New York, August 8. - Mr. 0 31 stating that he would attempt to 0 31 stating that he would attempt to who takes it prove it is just what 0 00 show by the records of the Police you need if you are weak and Department that there has been a languid. large increase in the number of robberies and burglaries in this city recently, and that it is the result of what has been called the "wide-open" policy. Mr. Moss said it was impossible, owing to the lax methods of the police, to tabulate a list of the crimes com mitted

Mr. Moss read from reports of 12 44 trials of deliaquent officers before 10 05 the Police Board. He instanced a Color work a specialty. Leave case where five officers had been charged with neglecting to report an attempted burglary, and with failing to take any steps to appre hend the criminals. The case against the officials had been dis-

for the committee. A summary showed that from January 1, 1e98, to May 15, 1899, 1059 robberies were reported. The total value of goods stolen was \$33.,394 Dillon made a comparison o

the twentieth precinct book and the chief's book. He pointed out various discrepancies, and said that there was no way of discovering from the police records how many robberies had been com-mitted and reported to the police within any given time.

The nineteenth precinct, the tenderloin, was taken up. Mr. Moss said that in 1897 there were 210 arrests for felony in this pre-

chief's books. From January 1, 1898, up to July 1, 1899, there was a total of \$28,597 stolen money reported on the felony book, most of which sum represented money stolen from men by the women of the tenderloin. The board adjourned until tomorrow.

#### WOMAN IN LEADING THEM.

El Paso, Texas, August 7. - Santa Teresa, the Mexican woman who has long been revered as a saint by the natives of Chihuahua and Sonora, and who is believed to possess the power of healing the sick by the laying on of hands, is believed to be more or less responsible for the present outbreak among the Yaqui Indians.

George Harold, an old Texas ranger, now a policeman of E! Paof evening on July 27. The balloon so, says that he is confident that rose rapidly, drifted away in the direction of Reading, and was the outbreak. Harold was one of quickly lost to sight in the clouds, the officers who rounded up the the officers who rounded up the ringlesders that raided the Mexican custom house at Palomas, Chihushus, a few years ago.

"Santa Teresa," he says, " was implicated in that rebellion, which was crushed in its incipioncy. loon, who gave signals that they Every rebel captured on this side of the line had a picture of the woman in his possession, and on the back of the picture was in-scribed one of her prayers." After the Palomas raid the Mex-

ican Government made an effort to apprehend her, and she was from the electric station, which looked upon as a dangerous character. She escaped to El Paso, however, and remained here a year or more. While here she was

and it afterward turned out that tained when the ascent took place. she had gone to Sonora and had The object of this experiment taken up her abode in the edge of was to give a practical demonstratible Yaquis villages, where she was

It is believed that she incited the Yaqui to revolt. The woman is described as frail and delicate looking. She undoubtedly posses ses great magnetic powers. Harhad a great deal to do with the uprising now assuming alarming proportions.

"An Empty Sack Connot Stand Upright."

Neither can poor, weak, thin blood nourish and sustain the physical system. For strength of nerves and muscles there must be pure, rich, vigorous blood. Hood's Moss, counsel for the Mazet in Sarsaparilla is the standard prevestigating committee, opened the paration for the blood, and its session of the committee today by fact that it does everybody good many remarkable cures and the
